**Amey Mahendra Thakur**

has successfully completed the online, non-credit Specialization

## Newborn Baby Care

In this specialization the learner acquired the skills necessary for newborn baby care to ensure that their health is optimized. The courses are designed to move the learner through the progression of care provided to healthy newborns in the first month of life. The first half of the specialization consists of clinical provisions such as initial medical interventions and screenings, health assessments and resulting diagnoses. The second half focuses on care provided at home including transport and sleep safety, nutrition, and parental and caregiver bonding.
